

Promising New Entrant in Rapidly Growing Data Security Market Receives First Contribution from NRC/IRAP

VANCOUVER, British Columbia, June 21, 2004 – Intact I.T. Inc., a recently established company developing advanced data security solutions, is pleased to announce that it has received its first National Research Council (NRC) Industrial Research Assistance Program (IRAP) financial assistance contribution.

This initial contribution supports and enhances the company's ongoing research and development efforts to deliver advanced enterprise-level data integrity, security and restoration systems and practices to computer users in the SME, SOHO and Consumer market segments.

Intact's research and development efforts incorporate, synthesize and extend the latest standards and methodologies in the fields of Data Compression, File Encryption, and Secure Storage and Transmission. Product and service delivery objectives are to provide convenient, user-focused solutions that facilitate Risk Management, Disaster Recovery and Business Continuity initiatives. In addition, services support customer compliance with Federal regulatory requirements such as The Personal Information Protection and Electronics Documents Act (PIPEDA)

"Intact IT Inc.'s research and development initiatives demonstrate a unique understanding and approach to the important field of data security," said Nicholas Fong, P. Eng., Industrial Technology Advisor of the N.R.C.'s Industrial Research Assistance Program. "I have been impressed by the expertise and resourcefulness demonstrated by their technical team in their effort to develop innovative and superior solutions which incorporate significant technical risk and challenge."

"Intact will rapidly position itself as a technology leader in data security as our suite of products and services are developed and released into the marketplace." says Jeff Warkentin, CEO of Intact I.T. Inc. "We are excited to be working with the N.R.C. and particularly with Nick. As security is an extremely important part of our technology, Nick's extensive background in the industry will be invaluable to our organization as we move forward."

About Intact I.T. Inc.:

Intact IT delivers "peace of mind" through simple, secure and reliable products and services that keep critical computer information safe.
